

Pharmacology, Physiology, and Therapeutics

Friday Afternoon Seminar Series

Fall 2011

SMHS Rm3933, Friday 2:00pm, unless noted otherwise

- September 9 Grant Hatch, Ph.D., University of Manitoba, Title: Towards a therapeutic approach to Barth Syndrome: A big role for a little cardiolipin remodeling enzyme (Host: Murphy)
- September 16 Kumi Combs, Ph.D., University of North Dakota, IPCED, Title: Intellectual Properties: Basics and Guidelines (Host: Geiger)
- September 30 Michael Zhu, Ph.D., University of Huston Medical School, Title: Novel channels for Calcium Signaling (Host: Singh)
- October 7 Charles W. Bourque, Ph.D., Professor, Centre for Research in Neuroscience, McGill University, Title: Control of vasopressin neurons by clock neurons and TRP channels (Host: Lei)
- October 14 Gordon Lithgow, Ph.D., Buck Institute for Aging Research, Title: Small molecules that slow aging (Host: Brown-Borg)
- October 21 Lawrence J. Marnett, Ph.D., Vanderbilt Institute of Chemical Biology, Title: Inhibition of COX-2 Oxygenation of Endocannabinoids: Implications for the Biochemistry and Pharmacology of NSAIDs (Host: Golovko)
- November 4 Qin Wang, M.D., Ph.D., Associate Professor, University of Alabama at Birmingham, Title Regulation of GPCR responsiveness by interacting proteins (Host: Porter)
- December 2 **Workshop Lecture: Animal Behavior Assessment (1:00-3:00pm, Tentative)** Dr. Maria Gulinello, PhD, Albert Einstein College of Medicine of Yeshiva University, Dominick P. Purpura Department of Neuroscience (Host: Murphy)
- December 9 Dave Ford, Ph.D., Saint Louis University Department of Biochemistry and Molecular Biology, Title: Lipid tinker toys: Tinkering with the hubs and connectors of cardiovascular disease (Host: Murphy)
- December 16 Heidi Scrable, Ph.D., Mayo Clinic, Title Epigenetic modifiers in stem cells (Host: Brown-Borg)
