Pathway Overview

Students accepted to the Pathway Program will:

• Prepare for advanced math and science courses.
• Participate in clinical exposure at hospitals and other health care facilities.
• Improve study skills, time management, note-taking, and test-taking.
• Learn about biomedical research.
• Be eligible for INMED/UND tuition waivers for the upcoming academic year.
• Plan curricula and college financing with an INMED counselor.
• Become acquainted with the UND campus, facilities, and other resources.
• Settle in at Grand Forks prior to the start of the fall semester.
• Meet other UND students with similar goals and interests.

Indians Into Medicine

The Indians into Medicine Program was initiated in 1973 at the University of North Dakota School of Medicine and Health Sciences. It has helped over 300 Indian health professionals—198 physicians—earn their degrees. UND is a national leader in educating American Indians, enrolling over 400 Indian students each year.

UND is host to a variety of Indian education initiatives, which are coordinated through the Office of American Indian Student Services. Several health science departments at UND are attracting increasing numbers of American Indian undergraduate and graduate students, including Clinical Psychology, Physical Therapy, Medical Laboratory Science, Occupational Therapy, Nursing, and Social Work. UND and INMED offer research opportunities at campus laboratories, and students can be placed at Indian health facilities for clinical internships.

For more information, e-mail: und.med.inmed@med.und.edu or visit the INMED website at www.inmed.UND.edu

Pathway Program

A six-week summer program for Community College students transferring to the University of North Dakota.

June 6—July 15, 2016
Summer Housing
Pathway students may choose to stay in a UND dormitory, family housing, or a local apartment. All room and board expenses will be paid while you are attending the six-week program. Transportation costs to and from the program will also be covered. Students must be accepted to enter UND in the fall to be eligible to stay in family housing during the summer. Students will eat in the UND cafeterias and attend classes in UND classrooms. This is an excellent opportunity for students to familiarize themselves with the UND campus before fall semester.

Other Resources
The INMED wing at the School of Medicine and Health Sciences includes a Learning Resource Center with a library, computer labs, and study and tutoring rooms. The program also provides audio/visual equipment and computer software/educational aids.
